

Verdurian and aUI Code Charts for Kurinto Fonts

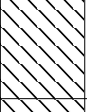

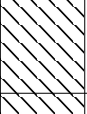

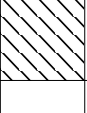

Kurinto_CodeChart_Aux2.pdf

This document provides code charts for Verdurian and aUI. These writing systems are implemented in the Aux variant of Kurinto fonts. For technical reasons, these code charts are provided in this secondary document. Please see the main Kurinto_CodeChart_Aux.pdf document for the other scripts in the Kurinto Aux variant fonts.

This document is provided as part of a release package of the Kurinto Font Folio, available at <https://www.Kurinto.com/>.

The Verdurian alphabet is used to write several languages of the Cadhinorian Plain on the world of Almea, most notably Verdurian, but also (with some supplemental characters) Caizu, Kebreni, Ismaîn, Sarroc, and Flaidish.

It derives from the ancient Cadhinorian alphabet (equivalent to the Verdurian capital letters), and this in turn derives from the alphabet of Cuzei. The Verdurian alphabet may be used to write both ancient languages, Cadhinor and Cuêzi.

Images of the Verdurian Alphabet are available at <http://www.zompist.com/znakora.html>.

In Unicode-encoded text, a Verdurian vowel may be followed by at most one diacritic. Graphically, of course, the diacritic appears above or below the letter.

In handwritten cursive text, Verdurian letters have several variant forms, depending on position in the word and on neighbouring letters. However, each letter is assigned only one Unicode value.
